New Nemo Back-Resting Corsets

THE new BACK-RESTING CORSET is the most important of all our inventions in this respect:—Its wonderful benefits will be enjoyed by nearly ALL WOMEN—the dainty and petite as well as those of medium to extra-large form. Especially GOOD FOR SLIM GIRLS AND SLENDER WOMEN

"It Rests Your Back!" The illustration shows the Back-Resting Straps, inside of the corset, on a tension when laced with the back

eyelets of the corset. As the straps are not as broad as the back of the corset, but cover the same space of the body, when adjusted and laced they give complete support to the small of the back. This restful support-

RELIEVES BACKACHE

-also gives a most effective flattening effect at the back, preventing the corset from riding up; it assists in ex-pansion of the chest and contraction of the abdominal region, and compels a graceful, erect military carriage when standing or walking.
